### SCOTT POLAR RESEARCH INSTITUTE

The Lectures for the Lent Term are as follows:

p. 142 **M.PHIL. (one-year course) IN POLAR STUDIES**

A series of seminars on a wide range of polar topics (environment, history, peoples, development, resources, administration), and addressed by many outside specialists, are held at the Scott Polar Research Institute in the Michaelmas and Lent Terms for those taking the M.Phil. in Polar Studies. Other graduate students who wish to attend any of these seminars should get in touch with the Course Director at the Institute, who will provide full details.

#### ANTHROPOLOGY AND RUSSIAN NORTHERN STUDIES GROUP

The Group's regular graduate seminar covers a wide range of topics, often with visiting speakers from Russia and elsewhere. The Group also runs specialist seminars covering the following topics: Reindeer herding; Oil, gas and society; Shamanism, spirits and environment; Therapy and the family in Russia; Governance and indigenous rights in the North. For details please contact Dr Piers Vitebsky on pv100@cam.ac.uk

##### The North Pole: logistics, air operations, 'Borneo' ice station, and ski adventures

###### Viktor Boyarskiy

The Curator of the Arctic and Antarctic Museum in St Petersburg has had extensive experience in both Polar Regions for many decades; indeed he is one of Russia's noted Polyarniks. For almost a decade he has been organizing adventure and similar private expeditions to the North Pole. Many of these are based on a summer drift station 'Borneo' from where fixed wing aircraft and helicopters are deployed. Victor will give an account of these operations and adventurers reaching the North Pole with modern methods

##### The voyage of Français, Jean-Etienne Baptiste Charcot, (1903-05)

###### Tony Billinghamurst

This lecture corresponds with the launch of a new book, the first English version of the French account of Charcot's first Antarctic expedition (translated by the speaker). Originally Charcot was prepared to sail to Greenland but responded to the news of the disappearance of Antarctic and Otto Nordenskjöld's Swedish Antarctic expedition. Français reached Buenos Aires, December 1903, in time for Charcot to receive the good news that expedition had been rescued. Regardless, and with a vessel fully equipped for an Antarctic expedition, he continued and wintered at Booth Island. The complement of 20 established huts ashore, made extensive surveys of the western coast of parts of the Antarctic Peninsula, and undertook a comprehensive scientific programme. Surveys and exploration were also made from the vessel and the results encouraged Charcot to return in 1908 aboard *Pourquoi Pas?* (an English account of which has been published).

##### Edward Whymper and the Arctic

###### Ian Smith

Edward Whymper (1840-1911) was by profession a wood-engraver who achieved fame as a mountaineer but he always wanted to be an Arctic explorer. He organized his own expedition to north-west Greenland in 1867 travelling with a naturalist, Robert Brown. They attempted, unsuccessfully, to explore the inland icesheet, and collected a valuable collection of Miocene fossil plants. Whymper made a second

visit alone to the same area of Disco Bay in 1872 during which he made, what he thought, was the highest ascent north of the Arctic Circle. Insufficient finance prevented subsequent Arctic expeditions. Whymper travelled extensively in many parts of the world and specialised in mountaineering (notably the Matterhorn). The majority of his papers (and his wood engraving tools) are deposited in the archives of the Scott Polar Research Institute.

##### North-East Greenland, a Brief History

###### Bob Burton

The speaker, who knows this distinctive region well from many expeditions, will review the history from the earliest accounts to current circumstances. Reports of the last of the Polar Eskimo, the most northern indigenes of the Earth begin the account. Explorations and research by William Scoresby and Edward Sabine are from the whaling period of the region. More detailed investigation by Robert Peary and Ludvig Mylius Erichson began around 1900 while Norwegian hunters and trappers were active in the region. The interesting case of Norway vs Denmark, where sovereignty was contested before the International Court of Justice, is an important event in the history of the region. More recent mapping, notably by the Joint Services Expedition (1977) and the Sirius Patrol bring the history to the modern period.

##### An Evening with Peter Hillary

###### Peter Hillary

The speaker, son of Sir Edmund Hillary, has climbed Mt Everest twice, survived K2, skied along a new traverse to the South Pole, climbed Vinson Massif the highest peak in Antarctica (4897 m), and landed at the North Pole. The event is described as 'a collection of ripping yarns from a member of one of the world's most famous families of high adventure'. Following the lecture there will be a reception in the Institute to allow the opportunity of meeting the speaker. It is a ticketed event the proceeds of which will be donated to the William Mills Library Acquisition Fund of the Institute. Tickets (including the reception) are £ 25 each and should be purchased in advance from *The Friends Secretary* addressed at the Institute.

The lectures are in the Scott Polar Research Institute, p. 142 Lensfield Road, Cambridge (telephone 01223 336540). They are open to all who are interested. Seats may be reserved, on request, for members of the Friends of the Institute. The Institute opens half an hour before lectures begin. Please arrive in time because most lectures involve use of projectors, which require the theatre lights to be dimmed. For safety reasons (as well as for the benefit of the lecturer and audience) anyone arriving after the lecture has begun may not be admitted. The Friends of the Institute usually serve light refreshments after the Saturday night lectures.

### IT/COMPUTER TRAINING COURSES (LENT TERM 2005)

The Computing Service offers the following IT training courses which are free for current staff and students of the University. Most courses start at 14.15 and end by 17.00 and are held at the New Museums Site, but there are exceptions so please check times and venues when registering. Some are entirely practical, while others take the form of a lecture and demonstration followed by a practical session, and a few consist of a lecture only. All information including times, locations and descriptions is provided on the Web ([www.cam.ac.uk/cs/courses/](http://www.cam.ac.uk/cs/courses/)). A printed timetable may be obtained from Computing Service Reception. The next programme after this one will be in the Easter Term, starting in late April 2005 but note that not all courses are repeated every term. In addition to instructor-led courses 'self-teach' materials are also available (see below), and the Computing Service also provides documentation on many topics in the form of handouts, information sheets and leaflets (see web page <http://www.cam.ac.uk/cs/docs/>).

It is essential to register, preferably by completing the online form at [www.cam.ac.uk/cs/courses/](http://www.cam.ac.uk/cs/courses/). If this is not possible, bookings may also be made by email to [course-admin@ucs.cam.ac.uk](mailto:course-admin@ucs.cam.ac.uk), tel. (3)34662 or in person at Computing Service Reception, New Museums Site, Pembroke Street. Bookings will be confirmed automatically and reminders sent a couple of days beforehand providing a valid email address is supplied. A standby system is used for oversubscribed courses; priority will be given to those who have booked in advance and who arrive in good time. If unable to attend for any reason, please cancel bookings giving as much notice as possible so that someone else may take the place, and to avoid waste of resources such as excess copies of printed notes.

It should be noted that, unless otherwise indicated, all courses assume basic computing skills; only those marked "novice friendly" are suitable for those with no previous experience.

\* indicates that some prior knowledge or experience of the topic is required, in addition to basic computing skills, as detailed in the individual course descriptions. In all cases this may be acquired by attending one or more of the introductory courses.

## Additions and Corrections

### Self-Teach Computer Training Courses

In addition to the programme of formal courses, a selection of self-paced training material is provided for loan, or in some cases purchase, from Computing Service Reception, New Museums Site, Pembroke Street. Modules on offer at the time of going to press are listed below, but new ones are added from time to time. As well as duplicating topics covered on the taught courses, for the benefit of those who cannot attend or who prefer this method of learning, they cover other subjects and also more advanced levels. It is advisable to ring (3)34600 to check availability beforehand. A deposit of £50 is required for courses which are borrowed; this usually takes the form of a cheque which is returned when the material is brought back on time and in good, fully usable condition. Some courses require a specific version of the software to be installed on the computer being used; in some but not all cases Computing Service facilities may be used. As with most commercial software, there are licence restrictions which forbid copying of courseware, unless expressly permitted. There is a short description for each course on the web ([www.cam.ac.uk/cs/courses/](http://www.cam.ac.uk/cs/courses/)); printouts can be generated if these are not accessible.
