Cambridge University Endowment Fund Governance report

30 June 2017

The University of Cambridge as Trustee of the Cambridge University Endowment Fund ('CUEF') presents the CUEF report and audited financial statements for the year ended 30 June 2017.

Constitution

The CUEF is constituted by a Trust Deed dated 30 June 2010 in which the University of Cambridge declared that it will hold the property of the CUEF on trust for the unitholders. The CUEF is a continuation of the Amalgamated Fund: a pool of investments previously held and managed by the University.

Eligibility to invest in the CUEF

The CUEF is available to the University and also to UK charities connected with the University (such as Colleges and trusts) provided that they qualify as 'high net worth companies' or 'high value trusts' or elect to be treated as 'professional clients' for the purposes of the Financial Services and Markets Act 2000 and are accepted as investors by the Trustee.

Governance

The Investment Board of the University is established to advise the Council of the University, through its Finance Committee, on matters relating to the investments held in the University's capacity as Trustee of the CUEF. Except for the Vice-Chancellor and one other member, the members of the Investment Board are independent of the University. The Investment Board works closely with the University's Investment Office.

The Trustee has appointed Cambridge Investment Management Limited ('CIML'), a wholly-owned subsidiary company of the University, to operate the CUEF. CIML is authorised by the Financial Conduct Authority since 6 August 2014 to manage the CUEF as an Alternative Investment Fund. The Board of CIML is comprised of the Vice-Chancellor and another member of the Investment Board of the University, the University's Director of Finance, and the Chief Investment Officer.

The Valuation Committee is responsible for determining the fair value of investments where these are not listed or infrequently traded and works closely with the Board of CIML.

The Trustee and CIML have appointed J.P. Morgan Europe Limited as depositary and all three parties have appointed JPMorgan Chase Bank, N.A. as custodian.

Management

The services of CIML are provided by the University's Investment Office and Finance Division as disclosed below. CIML does not have any employees, therefore no remuneration is paid by the fund or by CIML

Cambridge University Endowment Fund Governance report

30 June 2017

Remuneration

Staff employed by the University and engaged in investment management and administration functions for the Fund received aggregate remuneration as follows, including remuneration in respect of their other responsibilities in the wider University:

	2017	2016
	£m	£m
Senior management	1.4	1.1
Other staff	0.9	0.8
Total remuneration	2.3	1.9

Investment objective and distribution policy

The CUEF's objective is to be able to make distributions to be spent on the purposes of its charity investors in amounts which increase periodically, so as to represent constant purchasing power over the long term, and if possible to represent real growth in purchasing power. The amount distributed each year per unit in the CUEF is determined on a total return basis according to a formula based on the value of the investments and the rate of Retail Price Inflation. The CUEF's long run objective is accordingly to achieve or exceed an average annual rate of total return (i.e. income and net capital gains), net of all costs and before distributions are taken into account, equal to RPI plus 5.25%, such that after distributions are taken into account there will be annual growth in the fund unit value equal to RPI plus 1%.

A further objective is to manage judiciously the risk taken in order to meet the total return objective, by utilising diversification of investment strategies, of investment asset classes and of investment managers.

Investment responsibility

The CUEF is managed in accordance with the policies of the University and the other investors. The primary fiduciary responsibility of the Council of the University in relation to the University's investment assets is to maximize the financial return on those resources over the longer term, taking into account the amount of risk appropriate for the University investment policy. However there are circumstances when the University may balance against its primary responsibility considerations of the ethical nature of investments. The University's Statement of Investment Responsibility is published annually in the Cambridge University *Reporter*.

Cambridge University Endowment Fund Governance report

30 June 2017

Financial statements

These financial statements have been prepared in accordance with Chapter 3 of the Investment Fund sourcebook and FRS 102 'The Financial Reporting Standards Applicable in the UK and Republic of Ireland' as issued by the Financial Reporting Council. In applying FRS 102 the Director of Finance has had regard to appendix D the Statement of Recommended Practice: Financial Statements of Authorised Funds (revised May 2014) published by the Investment Management Association. In preparing these statements, the Trustee follows best practice; selects suitable accounting policies and then applies them consistently; makes judgements and estimates that are reasonable and prudent; states whether applicable accounting standards have been followed; and prepares the financial statements on the going concern basis.

The Trustee is responsible for ensuring that accounting records are kept which enable it to ascertain and to disclose with reasonable accuracy the financial position of the CUEF; and which enable it to ensure that the financial statements are properly prepared.

AM Reid Director of Finance

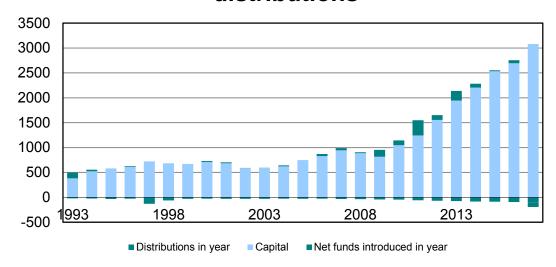

December 2017

30 June 2017

Fund size

The development of the fund over the last 25 years ending 31 July 2017, the University accounting date, is shown in the following graph.

CUEF value showing net additions and distributions

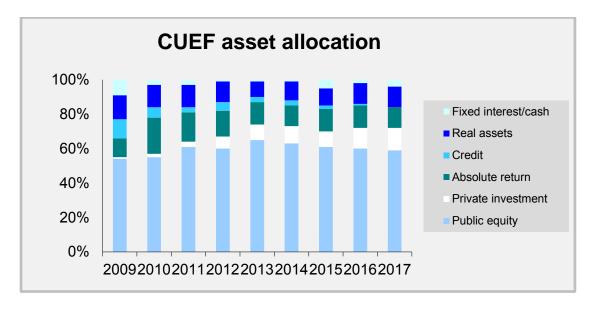

The CUEF changed its own accounting date to 30 June in 2007 in order to facilitate comparison with other collective investment funds.

30 June 2017

Asset allocation

The CUEF operates an evolving asset allocation. The asset allocations at recent year ends are shown below. Detailed numbers are shown in the Portfolio Statement.

Over the course of 2016-17 allocations to these broad asset classes did not change significantly. Small reductions in percentage terms were made to public equities and absolute return and the allocations to private investments and fixed interest/cash both increased. The longer-term returns from private credit and equity investments are expected to continue to be above those available in public credit markets and absolute return.

The equity focus of the CUEF is a consequence of the long term return objective of the fund. Within each asset class, fund managers are selected by the Investment Office and carry out the day-to-day investment transactions. Passive investment (for example index funds and futures) is also used for flexibility and transitionally (such as while new managers are being sought or new funds are being allocated). Overall currency exposure is managed by the use of forward foreign exchange contracts.

Selection of fund managers

A large proportion of the Investment Office's time is dedicated to identifying fund managers who exhibit the characteristics it seeks (integrity, strong process borne out by track record, stable establishment, and fair fee basis), making appropriate appointments and monitoring progress once appointments have been made. During the year under review, the CUEF made allocations to three new managers or funds, and made exits from five managers or funds that had served their purpose.

30 June 2017

Foreign currency exposures

Foreign currency is not regarded as an asset in itself, capable of generating long term returns appropriate to the cost and risk involved. The policy of the fund is therefore in general to hedge only a modest component of public equity positions back to sterling because movements between other currencies and sterling are expected to balance out in the long term when its managers have a global investment mandate and many of the companies they select have global trading activities, wherever they happen to be based.

However, fixed income, credit and hedge fund investments are either held in, or hedged back to, sterling, as additional currency exposure in these areas is not considered to be diversifying. A policy has been adopted of maintaining at least a minimum proportion of the fund in sterling exposures, irrespective of the investments held from time to time, in recognition of the periodic outflow of sterling distributions to which the fund is committed. During the year, the fund's exposure to sterling has been between 50% and 55%.

Comments

The fund achieved a total return of 18.8% in the financial year, which represented the capture of 85% of the performance of the world's equity market index (in sterling). Despite a steady fall in broad market volatility, an increase in the dispersion of individual stock returns in the second half of the year favoured active management, and the CUEF benefitted from the outperformance of its equity and hedge fund managers compared to their benchmarks, as well as strong performance in its private investments and direct property assets.

Anticipation of reflationary fiscal policy and firmer monetary policy after the US presidential election prompted strength in the US dollar and a significant rotation between equity industry sectors. The expected developments favoured banks and other financials over sectors such as consumer staples, telecoms and utilities that had been attractive to equity investors seeking lower volatility and dependable dividend income in a very low interest rate environment. However, as expectations of policy change under the Trump presidency languished in the first half of 2017, these relative sector movements reversed, and Europe, Emerging and Asia Pacific ex-Japan markets then outperformed other regions such as the US, UK and Japan (in common currency terms). In the US market, the dominance of advances in large cap technology stocks became notable.

Over the year, the Federal Reserve moved to increase rates only very gradually, there were few immediate signs of inflationary pressure despite full employment conditions, energy prices were subdued, and trends in economic growth generally favourable, especially in Europe (from a low base). Moreover, growth in corporate earnings was positive, and in line, rather than beneath, consensus expectations, while the few underperforming companies, swiftly punished by the market, were

30 June 2017

Comments (cont'd)

usually value traps. Overall conditions were benign, continued to favour equities over other asset classes, but also caused few investments to be objectively cheap relative to their histories. Aside from a growing list of geopolitical concerns, the principal investment risk is that of bond market weakness, whether arising from the suspension or reversal of Quantitative Easing programmes or a rise in inflation.

N Cavalla Chief Investment Officer

October 2017

Cambridge University Endowment Fund Portfolio statement

30 June 2017

	£m	2017	£m	2016
Public equity	1,734.6	59%	1,587.1	60%
Private investment	384.4	13%	323.0	12%
Absolute return	353.5	12%	356.5	13%
Credit	11.7	0%	17.3	1%
Real assets	333.1	11%	302.1	11%
Fixed interest/cash	138.1	5%	71.1	3%
Total portfolio	2,955.4	100%	2,657.1	100%

The investment portfolio comprises the investments shown in the balance sheet plus £43.9m (2016: £22.2m) shown within cash less £25.2m (2016: £11.2m) received from investors in advance for new units and shown within payables.

Notes on asset classification

Public equity includes all equity stocks traded on a liquid market, together with related non-publically traded index funds (which invest in investments with similar characteristics) and derivatives (such as futures).

Private investment includes investments where initial capital commitments are drawn down over a period, and the proceeds of the investments once disposed of are returned over the life of each fund. The underlying investments include both unlisted equities and corporate credits (such as bonds, loans and other claims).

Absolute return includes investments in trading strategies which are in some degree independent of overall equity market movements. Funds where different equities are simultaneously held (long) and sold (short) are included in this category.

Credit includes corporate securities (such as bonds and loans) traded on a liquid public market.

Real assets include investments which are expected in some degree to increase in nominal value to match inflation. This category includes property and securities which reflect the level of commodity values. However inflation-linked government securities are included in the fixed interest category below.

Fixed interest/cash includes cash at bank and on deposit, government securities, the net value of foreign currency contracts and any amounts receivable in general, less amounts payable, including those arising from holding derivative contracts.

Independent auditors' report to the Unitholders of The Cambridge University Endowment Fund

Report on the audit of the financial statements

Opinion

In our opinion, The Cambridge University Endowment Fund's financial statements (the "financial statements"):

give a true and fair view of the financial position of the Fund as at 30 June 2017 and of the net revenue and the net capital gains of its scheme property and cash flows for the year then ended; and

have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards, comprising FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland", and applicable law), the Trust Deed and the Investment Funds Sourcebook.

We have audited the financial statements, included within the Reports and financial statements (the "Annual Report"), which comprise: balance sheet as at 30 June 2017; the statement of total return, the statement of change in net assets attributable to unitholders for the year then ended the statement of cash flows; and the notes to the financial statements.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities under ISAs (UK) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, which includes the FRC's Ethical Standard and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Conclusions relating to going concern

We have nothing to report in respect of the following matters in relation to which ISAs (UK) require us to report to you when:

the Investment Manager's use of the going concern basis of accounting in the preparation of the financial statements is not appropriate; or

the Investment Manager has not disclosed in the financial statements any identified material uncertainties that may cast significant doubt about the Fund's ability to continue to adopt the going concern basis of accounting for a period of at least twelve months from the date when the financial statements are authorised for issue.

However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the Fund's ability to continue as a going concern.

Reporting on other information

The other information comprises all of the information in the Annual Report other than the financial statements and our auditors' report thereon. The Investment Manager is responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

Responsibilities for the financial statements and the audit

Responsibilities of the Investment Manager for the financial statements

As explained more fully in the Governance Report set out on page 3, the Investment Manager is responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view.

In preparing the financial statements, the Investment Manager is responsible for assessing the Fund's ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the Investment Manager either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditors' report.

Use of this report

This report, including the opinion, has been prepared for and only for the unitholders of the Fund as a body in accordance with the Trust Deed and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

1. General information

The Cambridge University Endowment Fund ('CUEF' or 'the fund') has been established by the University of Cambridge for the management of long term investments. The fund is a collective investment scheme in the form of a unit trust. The fund is managed by Cambridge Investment Management Limited, a wholly owned subsidiary of the University which is authorised by the Financial Conduct Authority. These financial statements have been prepared by the Director of Finance of the University.

2. Summary of significant accounting policies

Basis of preparation

The financial statements have been prepared on a going concern basis in accordance with Chapter 3 of the Investment Management Sourcebook and FRS 102 (Financial Reporting Standard 102) 'The Financial Reporting Standard Applicable in the UK and Republic of Ireland' as issued by the Financial Reporting Council. The principal accounting policies applied in the preparation of these financial statements are set out below. In applying FRS 102 the Director of Finance has had regard to appendix D of the Statement of Recommended Practice ('SORP') for the financial statements of authorised funds (revised May 2014) published by the Investment Association.

Critical accounting estimates and judgements

The preparation of the financial statements requires the exercise of judgement both in the application of the accounting policies which are set out above and in the selection of the assumptions used in the calculation of estimates. These judgements and estimates are continually reviewed and evaluated based on historical experience and other factors, however actual results may differ from estimates. The component of the financial statements most significantly affected by the exercise of judgement is as follows:

Investments which are not listed or which are not frequently traded are stated at the Valuation Committee's best estimate of fair value. With respect to investments held through pooled funds or partnerships, reliance is placed on unaudited valuations of the underlying listed and unlisted investments as supplied to the CUEF custodian by the administrators of those funds or partnerships. The principles applied by the administrators to those valuations are reviewed to ensure they are in compliance with CUEF policies. With respect to other investments, recognized valuation techniques are used, that may take account of any recent arm's length transactions in the same or similar investment instruments. Where however no reliable fair value can be estimated, investments are stated at cost.

30 June 2017

2. Summary of significant accounting policies (cont'd)

Net capital gains/losses

The CUEF accounts for the total return from its investments, in accordance with its investment objective as set out in the Governance Report, and its distributions are not calculated based on net income and gains. For this reason no distinction is made between realised and unrealised gains/losses. Management however, estimate the realised gain during the period to be approximately £73.4m and the realised loss to be approximately £3.2m out of a reported total net gain of £472.9m.

Recognition of total return

Dividend income receivable is recognised when the shareholders' rights to receive payment have been established, normally on the ex-dividend date, net of any withholding tax. Rental is accrued on a time basis and interest income is recognised using the effective interest rate method. Lease incentives and rent free periods are treated as a reduction to rent and are amortised on a straight-line basis over the period of the lease. Expenses payable are accrued on a time basis. All other elements of total return, including dividends received in the form of shares, and expenses incurred within pooled funds and partnerships, are included within net capital gains/(losses). No separate disclosure is made of items related to derivative investments such as futures, which are held instead of conventional securities if it is more efficient to obtain exposure to certain markets thereby.

Foreign currencies

Transactions in currencies other than sterling are recorded at the rates of exchange applicable to the dates of the transactions. Balance sheet items denominated in foreign currencies are translated at the rates prevailing at the reporting date. The unrealised net gain or loss on open forward foreign currency contracts is included within 'fixed interest/cash' in the portfolio statement.

Taxation

The University and the other investors are conditionally exempt from taxes on income and capital gains in the UK and in many other jurisdictions. UK value added tax borne by the fund is treated as an expense. During the period the fund suffered withholding tax of £1,011,131 (2016: £693,219) on income from overseas investments.

Investments

Investments are recognised at the time of the relevant transaction and shown in the balance sheet at fair value. Fair value is based on mid-market prices, or in the case of participations in pooled funds on the most recent fund administrator's statement available at the monthly cut-off date, or otherwise on the Chief Investment Officer's valuation. Directly held property is valued by Knight Frank LLP in accordance with the standards of the Royal Institute of Chartered Surveyors.

30 June 2017

2. Summary of significant accounting policies (cont'd)

Derivatives

All derivatives are stated at fair value. Where there is a legal right and intention to settle the contract on an offset basis, the fair value of the derivative is netted against the corresponding equity investment within investments.

Capital contributions

Amounts received from investors for subscriptions are accounted for within creditors until the relevant dealing date which is normally the first business day of a calendar quarter.

Distributions

A monthly distribution is made in respect of each unit in issue. The amount is set annually with effect from August according to a formula giving a 30% weighting to 4.25% of the average net asset value of the fund over three years and a 70% weighting to the previous year's distribution amount as increased for inflation. In the long term this formula is intended to increase or decrease the distribution in line with investment performance, while mitigating against major annual increases or decreases.

3. Expenses

	2017	2016
	£m	£m
Investment advisory or management fees	8.9	7.5
Other expenses	6.6	5.0
Total expenses	15.5	12.5

Other expenses include audit fees of £17,721 (2016: £17,000)

4. Investment properties

Investment property reconciliation

	え川
Opening investment property value within 'Real assets'	163.5
Additions	7.1
Disposals	(8.0)
Net valuation adjustment	15.0
Closing investment property value within 'Real assets'	177.6

5. Borrowing

There is no direct borrowing within the fund and all derivative investments are fully covered by cash. There is indirect borrowing through participation in pooled funds and partnerships some of which employ leverage techniques.

£m

30 June 2017

6. Commitments

At the reporting date the fund had the following commitments to make investments:

	2017	2016
	£m	£m
Public equity	14.1	13.7
Private investment	323.5	282.3
Real assets	<u>62.8</u>	61.5
Total commitments	$4\overline{00.4}$	357.5

7. Related parties

All investment management and administration functions are carried out by Cambridge Investment Management Limited, a wholly owned subsidiary of the University utilising resources in the Investment Office and Finance Division of the University, the costs of which are borne by the fund.

The University and its subsidiary undertakings had holdings totalling £2,690.5m (2016: £2,475.9m) at the reporting date. Distributions to the University and its subsidiary undertakings in the year totalled £89.2m (2016: £86.7m).

9. Risk management policies and procedures

As a collective investment scheme the fund invests in various categories of assets for the long term in order to achieve the investment objectives set. In order to pursue these objectives the fund seeks exposure to a variety of risks that could however result in a reduction in the fund's net assets. The principal risks and the investment manager's approach to managing them are set out below under the following headings: market risk (comprising currency risk, interest rate risk, and other price risk), liquidity risk, and credit risk.

Market risk

Market risk embodies the potential for both losses and gains and includes currency risk, interest rate risk and other price risk. Market risk in total is managed on a regular basis by the Chief Investment Officer. The University's Investment Board meets at least four times a year to discuss with the Chief Investment Officer asset allocation strategies and market risk.

Currency risk

Some of the fund's assets, liabilities and transactions are denominated in currencies other than its base currency of sterling. Consequently the fund is exposed to the risk of movements in exchange rates. The fund's currency positions are reviewed regularly by the Chief Investment Officer and the currency exposure is managed within the asset allocation strategy. The currency exposure for overseas investments is based on the quotation or reporting currency of each holding, while the currency exposure for net monetary assets is based on the currency in which each asset or liability is denominated. The fund had the following principal net exposures:

	2017	2016
	£m	£m
Pounds sterling	1,486.0	1,403.1
US dollar	1,185.4	835.6
Euro	16.1	89.6
Japanese yen	116.7	92.2
Taiwan dollar	27.7	23.5
Indian rupee	22.0	18.3
Hong Kong dollar	27.4	34.0
Canadian dollar	15.8	10.0
Other currencies	<u> 58.3</u>	<u> 150.8</u>
	<u>2,955.4</u>	<u>2,657.1</u>

30 June 2017

9. Risk management policies and procedures (cont'd)

Interest rate risk

Movements in interest rates affect the fair value of investments in fixed interest rate securities and the income receivable on cash deposits. The possible effects on fair value and cash flows as a result of an interest rate change are taken into account when making investment decisions.

Other price risk

Other price risk is the risk that the value of a security will fluctuate as a result of changes in market prices (other than those arising from currency risk or interest rate risk), whether caused by factors specific to an individual investment or its issuer or by factors affecting all securities traded in that market. As the majority of the fund's investments are carried at fair value with fair value changes recognised in the statement of total return, all changes in market conditions will directly affect reported total return and net assets. The fund's asset allocation at the reporting date is shown in the portfolio statement. If the fair value of the entity's investments varied by +/- 5%, the total return before distributions for the period ended 30 June 2017 would change by +/- £147.8m (30 June 2016: +/-£132.9m).

Credit risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the fund. This risk is managed in a combination of ways. Primarily, the fund managers appointed for the fund have responsibility for choosing reliable counterparties when instructing transactions on behalf of the fund. Where investments in the fund are managed directly, investment transactions are carried out with well established, approved brokers. All investment transactions are done on a cash against receipt or cash against delivery basis.

The fund's credit exposure to debt instruments is managed by investing in marketable securities and with counterparties that have acceptable credit quality of at least investment grade BBB- or higher.

9. Risk management policies and procedures (cont'd)

Credit risk (cont'd)

The fund also minimises credit risk through banking polices which involve placing deposits only with highly regarded financial institutions. The value of cash, as shown on the portfolio statement, best represents the credit risk exposure at the reporting date.

The credit ratings of counterparties with which cash was deposited were as follows:

Moody's rating	2017 £m	2016 £m
A1/P-1	8.0	_
A2/P-1	_	7.8
Aaa-mf	43.9	22.2
	51.9	30.0

10. Fair Value

The following table categorises the fair value of the fund's investment assets and liabilities based on the inputs to the valuation. Categorisation within the hierarchy has been determined on the basis of the lowest level input that is significant to the fair value measurement of the relevant asset as follows:

Level 1: Valued using quoted prices in active markets for identical assets.

Level 2: Valued by reference to valuation techniques using observable inputs other than quoted prices included in Level 1

Level 3: Valued by reference to valuation techniques using inputs that are not based on observable market data

		017 £m		016 ≳m
Valuation	Assets	Liabilities	Assets	Liabilities
Technique				
Level 1	981.9	(21.8)	897.5	(108.0)
Level 2	1,723.9	_	1,658.9	_
Level 3	229.2	_	197.7	
Total Investments at fair value	2,935.0	(21.8)	2,754.1	(108.0)

30 June 2017

10. Fair Value (cont'd)

A reconciliation of the opening and closing balances for Level 3 assets measured at fair value is detailed in the table below:

	£m
Fair value 1 July 2016	197.7
Purchases less sale proceeds	12.3
Total gains	19.2
Fair value 30 June 2017	229.2

Unquoted investments include investments in hedge funds, private equity funds and property funds. The fair values of unquoted investments and derivative financial instruments held through pooled funds and partnerships are based on valuations of the underlying investments as supplied to the University's custodian by the administrators of those funds or partnerships. The Council considers that no reasonably foreseeable change to key assumptions in the Level 3 valuations would result in a significant change to fair value. Transfers into and out of Level 3 occur when the classification of the underlying assets and liabilities of these funds changes.
