REPORTS

Report of the Council pursuant to Special Ordinance A (ii) 7 concerning an initiated Grace relating to fossil fuel industry ties

The COUNCIL begs leave to report to the University as follows:

1. The Council has received and considered the following Grace, which has been initiated under Special Ordinance A (ii) 5 by 84 members of the Regent House (*Reporter*, 6666, 2021–22, p. 640):

The Regent House asks the Council to agree that the University of Cambridge will not accept research funding or allow sponsorship or other collaborations with companies if they meet one or more of the following criteria:

- *They are constructing, or facilitating the construction of, new fossil fuel infrastructure.*
- *They are engaged in exploring, or facilitating the exploration of, new fossil fuel reserves.*
- *They retain memberships with trade associations engaged in political lobbying against science-based climate legislation.*

The Council should also instruct the University's Development and Alumni Relations department, CUDAR, to conduct fundraising and development activities in order to replace funding which has traditionally been derived from companies which meet these criteria.

2. The Council shares the desire implicit in the Grace to address the climate emergency as a matter of urgency and is committed to supporting the University's efforts to turn its world-leading research on the energy transition into tangible solutions. It has demonstrated its commitment to global decarbonisation through the establishment of the Cambridge Zero initiative and the adoption of science-based targets for carbon reduction within the University's own operations. It recognises that there is likely to be support within the University for the underlying aims of the Grace, but also that some members of the University have legitimate concerns about the potential for the means proposed to restrict research that could enable the transition to a carbon-neutral future. Given the diversity of views, the Council wishes to enable the University community to engage fully on the issues. The Grace asks the Council to consider changes to its current position on the acceptance of funding.¹ It will take some time to explore, and give proper consideration to, the full implications of these changes. The Council's aim is to enable the University to have an informed debate on those changes, once in possession of all the facts. It has therefore decided to withhold authorisation of the Grace, for the reasons given in paragraphs 3 and 4 below, and is recommending that the Regent House approve its decision.

3. The Council recognises that it should make every effort to respond to Graces initiated by members of the Regent House in a timely manner. Nevertheless, it is also important

5. For the reasons given above, the Council has decided to withhold authorisation of the initiated Grace and **recommends** that the Regent House approves that decision.

that it has sufficient information to do justice to the proposals and to be able to reach an evidence-based decision. The Council has therefore chosen to commission a study to analyse the likely impact of the proposals in the Grace on the University's research and teaching activities, including its ability to deliver solutions which contribute to the energy transition, and on academic freedom within the University, as well as the feasibility of replacing any funding affected through fundraising and development activities. The Council has asked to receive the study as early as possible in the Lent Term 2023. It will keep the Regent House informed as to the exact timetable for delivery of the study, which it will publish in the *Reporter*. When the study is completed, the Council has committed to engaging fully with the Regent House to facilitate thorough and deep debate, assisted by the findings of the study. The Council's aim is to ensure that the pros and cons of the original Grace and of alternative formulations and approaches to respond to the concerns expressed in the Grace are fully considered. The Council is also committed to ensuring that the Regent House and other members of the collegiate University are given a full opportunity to contribute to discussion on the way forward.

4. The Council notes that the Grace is framed as a request, which is consistent with the Council's authority under Statute A IV 1(a) to set policy in the areas covered by the Grace. The Council considered whether it could authorise the Grace for submission on the basis that it was framed as a request, enabling all members of the Regent House to decide whether or not they supported the request being made, before the Council then considered whether to implement the Grace's proposals. However, its early consideration of the Grace has raised several concerns about the breadth and scope of the Grace, and the reputational, financial and legal consequences of adopting the course put forward by the Grace. As noted above, it does not wish to propose the approval of a Grace without a thorough debate and a full understanding of the implications for the University of the changes it proposes. Further, it does not wish to raise expectations about the ability of the Grace's proposals to be implemented as presented. The evidence-gathering and investigation brought together in the study will enable the Council to assess carefully whether the proposals made by the Grace can be implemented in a way that:

- supports academic freedom and other freedoms associated closely with academic life;
- is consistent with the University's charitable purposes in relation to research and teaching;
- does not compromise the University's ability to be financially sustainable.

¹ See the Council's guidelines governing the acceptability of donations and other external funding to the University: climate change (*Reporter*, 6590, 2020–21, p. 15).
